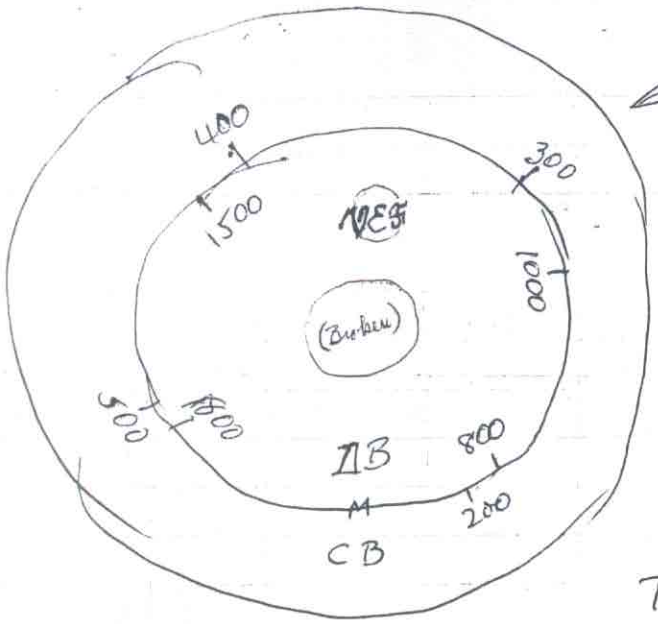
Notes from examination of Oswald's radio

Tuning, push buttons at top. Horiz. dial on right (volume?)



Model No.?

TT MTT-56

(inside on circuit sheet)

Mytel

← insignia below speaker grill

Jack input on top (might be for phono input or antenna)

12" x 3" x 8"
(L) (D) (H)

FBI No. A-2

Weight about 6-8 lbs.

The pointer on the tuning dial was broken off and there was no power cord. Interior appeared intact, and had typical looking circuitry, perhaps 6 or 8 tubes.

Had plastic case, not much different from American table radios. Had carrying handle of conventional design. Looked generally like a mass-production, consumer item — definitely not a specialty item.

RGS 6/13/72
